

“Customized to Your needs...”

AUTOMATION & CUSTOMIZED BRACKETS

Custom Made Mounting Solutions that can be Integrated into Your Production Processes for Efficiency and Productivity.

Mounting System

Offer a complete set of brackets for attaching our tool to a production machine. Customized mounting brackets can be developed in-house or incorporated into an existing system using our tools.

**Angle Mounting System for X1 Body Style Tools
(Left and Right)**

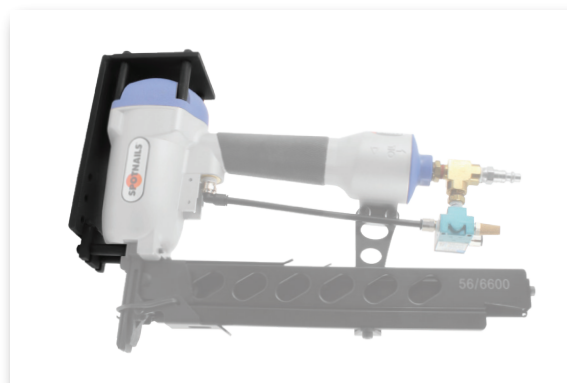

Custom-Built Mounting System

**Angle Mounting System for W1 Body Style Tools
(Left and Right)**

Custom-Built Mounting System

Front Mounting System

Connecting Plates

Most of our tools can be fitted into production processes using the connecting plates. A machine with a mounted bracket can use these connecting plates to install our tools.

Connecting Plate T Style

Connecting Plate H Style

**Connecting Plate with
Pin Locators**

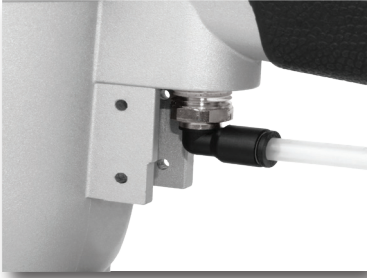

Custom-Built Connecting Plates

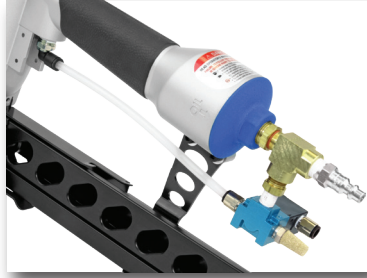

“Tools for Automated Equipment...”

Remote Actuation Systems

Three different options in our remote actuation valves that are quick replacements in existing system.

Normally ON with Air Pilot

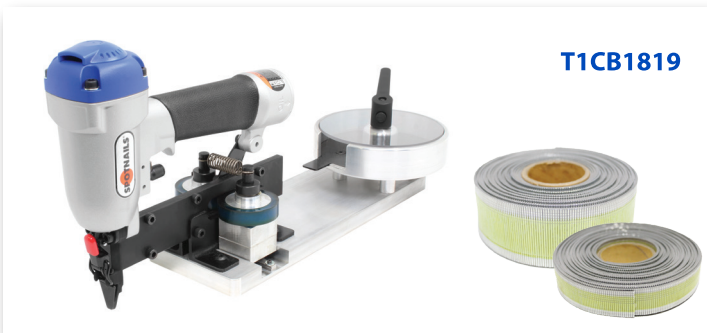

Normally OFF with Air Pilot

**Normally OFF with Electric Solenoid
(24 VDC or 120VAC)**
