## TERMS OF SALES

### Credit Accounts

Upon receipt of completed credit application, resell certificate, opening order and approval, terms will be Net 30 Days from date of invoice.

Accounts NOT paid within 30 days will incur a 1.5% per month service charge. Accounts that chronically fail to meet Net 30-Day terms will be placed on prepayment status.

All shipments are F.O.B. Spotnails distribution centers. Any discounts offered apply only to the base price.

## SALES POLICY

There is no minimum order size.

We sell only to distributors and companies that sell and/or repair construction related tools and accessories. We do not sell directly to end users.

## FREIGHT POLICY

Parts orders over \$350 qualify for free Ground Service for commercial delivery locations to the 48 contiguous United States.

A mixed order of parts and tools or fasteners will need to be priced over \$2,500 to also qualify for FREE SHIPPING to the 48 contiguous United States.

RPI branded O-Rings under \$1.00 must be sold in increments of 25 pieces.

Cannot be combined with special priced tool discounts.

## FREIGHT ACCESSORIAL FEES

Freight accessorial charges are not part of the prepaid freight terms regardless of the order size.

A flat rate of \$60 accessorial charges will be applied on Residential or Lift Gate.

## WARRANTY

Spotnails and Reliability Provin, Inc. (RPI) warrants its products to be free from defects in material and workmanship as further described below. Spotnails/RPI makes no warranty, whether expressed or implied, with respect to the merchantability or fitness of its Tools, Fasteners, or Parts for any particular purpose. In no event shall Spotnails/RPI be liable for consequential damages.

Spotnails/RPI will, at its own option, replace or allow credit for any of its parts which it determines to be defective. Our sole responsibility is limited to the price paid by the purchaser. Spotnails/RPI shall not be liable for any damages arising out of or in connection with the use of parts manufactured or supplied by Spotnails/RPI.

### Claims

All product warranty claims by the end user are to be initially processed by the Spotnails/RPI distributor who will then further process the claim with the Spotnails/RPI Customer Service Department. Upon notification by a Spotnails/RPI distributor of warranty claim, the customer service department will assign a Returns Material Authorization (RMA number).

## FREIGHT CLAIMS

Signature is required at the time of delivery.

Inspect freight immediately for visible damage and document on POD "DAMAGED FREIGHT" before driver leaves with his initials.

MUST provide photos and any documentation needed to file a claim.

MUST notify Spotnails at customerservice@spotnails.com within three (3) business days so an RMA can be issued. The claim will be denied if not filed within that time period.

The consignee is responsible for damaged freight on "collect" shipments.

## RETURNS / EXCHANGES / CREDITS

Goods returned to us for credits or exchanges must comply with the following (NO RETURNS WILL BE ACCEPTED WITHOUT PRIOR AUTHORIZATION):

1. Goods must be current and unused stock items. Run-to-orders, specials, obsolete products, and parts are NOT returnable.
2. The Customer Service Department, or your Sales Representative must first assign a Return Merchandise Authorization (RMA Number) for a return.
3. Prepayment of return transportation is required (unless due to a warranty issue as approved by Spotnails/RPI).
4. Returned merchandise is accepted for credit at the original invoice price, or the current price (whichever is lower), and is subject to inspection and a 20% handling/restocking charge. Products returned for credit must be in good and saleable condition.
5. The cost of any additional reconditioning or necessary packaging will be deducted from the credit or exchange.

# Reliability Provin STEEL Program

Introducing the Reliability Provin STEEL Program.

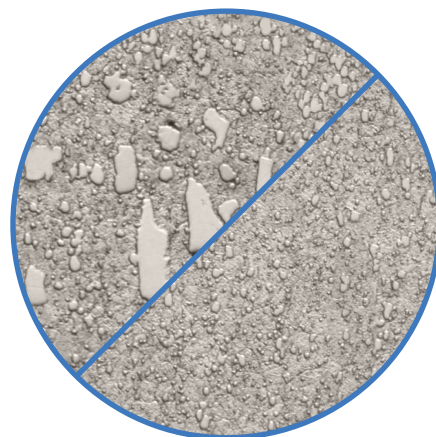

The STEEL Program is a **5-step process** to ensure complete customer satisfaction and product reliability.

With every new driver blade, this process is closely followed so that the final product meets our strict standards for quality.

## What Does STEEL Represent?

- S** - Selective Sourcing
- T** - Tempering and Treating
- E** - Expert Assembly
- E** - Ease of Service
- L** - Lifetime Testing

How does the  
**STEEL** program  
set us apart from  
the competition?

## S - Selective Sourcing

The STEEL Program begins by sourcing only the best steel based on chemical and micro-structure analysis.

After raw materials have been selected, state-of-the-art machining centers form parts to exact specifications.

## T - Tempering and Treating

Our state-of-the-art heat treatment process dissolves large carbon deposits found in the raw steel.

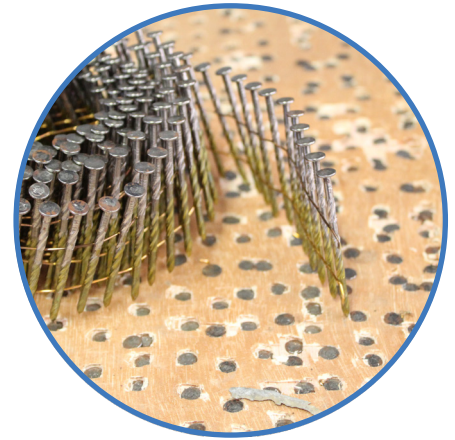

A lack of large carbon deposits makes the steel structure more uniform and resistant to breakage.

## Choosing the Right Blade for the Job

The right blade for you depends on your usage and application.

**A-SERIES** blades are made from one of the most shock absorbent steels available. Perfect for **high impact** applications.

**X-SERIES** blades are made from one of the hardest steels available. Perfect for **high wear** applications.

## E - Expert Assembly

At Reliability Provin, we are always expanding our line of piston driver assemblies.

During assembly, our driver blades are cleaned of debris and primed before applying a powerful bonding agent.

Aircraft grade aluminum pistons are used for long lasting performance.

## E - Ease of Service

After shipment, we make it easy for our customers to follow up on their products.

Date stamps enable us to track batch issues and ensure quality product is always shipped.

A variety of long-life and oversized O-Rings are available to ensure the best performance in all conditions.

## L - Lifetime Testing

A two stage blade testing process provides us with the knowledge and data to ensure the best possible products.

Using computer simulated stress-load calculations, we can identify problem areas and set test methods.

Real-world application testing ensures maximum performance in the tool and on the job.

# Bumper & Gasket Materials

## Standard & Premium Materials

Reliability Provin offers its line of bumpers and gaskets in industry proven materials.

Standard materials will always match the great quality we are known for in our products. While our premium materials offer improved life, tool performance, and minimizes down time.

### NBR Rubber (Nitrile)

NBR Rubber is a general use material that has excellent heat and chemical resistance and is well suited for most applications.

These bumpers are our most affordable offerings allowing you to keep all your tools in top shape without breaking the bank.

### TPU Urethane

TPU Urethane is a higher performance material that is better suited for lower temperatures and colder climates.

Choosing the right material is dependent on your job site conditions and is vital to maintaining long life of your bumper.

## PPDI Urethane - Better than OEM!

PPDI Urethane is a proprietary material that give you performance that meets and exceeds it's OEM counterpart.

PPDI Urethane is a high performance material that combines high and low temperature properties for long life in all climates.

Check back regularly as we are always adding to our product line up.

## Compressed Fiber Gaskets

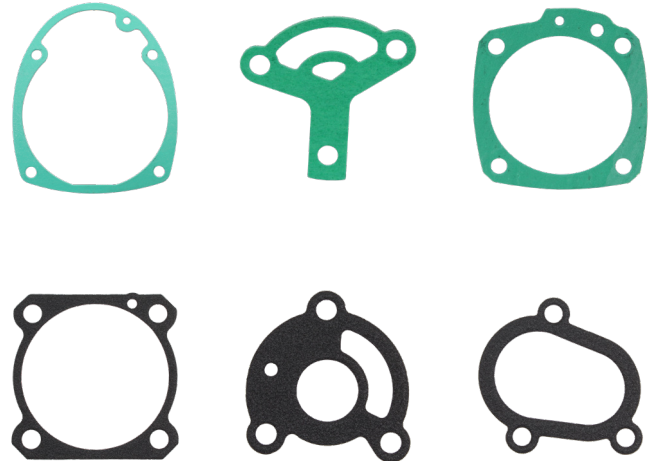

Our compressed fiber gaskets are made from Klingsil C-4401 or equivalent material.

Klingsil C-4401 is composed of Nitrile bound synthetic fibers making it ideal for use in high and low temperatures.

## Why Use an Overmolded Gasket?

Overmolded gaskets are a premium product constructed with a steel core and are coated in a soft rubber foam.

The steel core provides rigidity and improved resistance to pressure. Meanwhile, the rubber foam provides a solid bond between surfaces. This means that even the most well used tools can be repaired and continue service.

# O-Rings & Repair Kits

## O-Rings for Every Occasion

Reliability Provin has over 650 unique O-Rings available in different materials. Long life versions of our most common O-Rings ensure that your tool operates safely and efficiently for longer.

## Specialty O-Rings

Quad, Square and Internally Lubricated O-Rings for specialty tools are also available.

## O-Ring Repair Kits

We offer O-Ring repair kits for a wide variety of tools. These kits are used to replace old O-Rings throughout the tool during a rebuild.

## Don't See What You Need?

In the event that we do not stock the item that you need, please contact us with your O-Ring specifications.

### Buna-Nitrile

- General compound able to be used in all manner of workloads.
- High availability and low cost.
- Excellent resistance to petroleum based oils and hydrocarbon fuels.
- Meets ASTM specifications.
- Operating temperature range of -40F to 250F to ensure long life.

### Urethane

- The most customizable material able to be tailored to the application.
- Performance in tool is sustainable for longer periods with higher resistance to wear and tear.
- Meets ASTM specifications.
- Excellent elasticity over large periods of time.
- Operating temperature range of -30F to 180F to ensure long life.

### Internally Lubricated

- Offers the same general performance as our Buna-Nitrile O-Rings.
- Provides longer lasting performance where external lubrication is not enough.
- Operating temperature range of -40F to 250F to ensure long life.

### Viton

- Offers exceptional resistance to oils, lubricants and other chemicals.
- Maintains its shape with excellent compression set resistance to ensure a tight seal through the life of the O-Ring.
- Operating temperature range of -20F to 400F to ensure long life.
- Meets ASTM D200 and SAE J200 specifications.
